

W widoku

```
<link rel="stylesheet" href="https://unpkg.com/vue-multiselect@2.1.0/dist/vue-multiselect.min.css">
```

Komponent

```
<multiselect :multiple="true" v-model="value" :options="users" label="name" :custom-label="nameFormatter" tag-placeholder="Add this as new tag" placeholder="Search or add a tag" track-by="id" :taggable="true" @tag="addTag"></multiselect>
```

```
import Multiselect from 'vue-multiselect';
```

do relacji producer z modelu

```
data(){  
  return{  
    users:[],  
    value: [],  
    options: ['vue', 'script', 'com'],  
    producer: [],  
  
  }  
},
```

Metody

```
methods:{  
  nameFormatter({ name, producer }) {  
    return `${name} (${producer.name})`;  
  },  
  
  addTag (newTag) {  
    const tag = {  
      name: newTag,  
      code: newTag.substring(0, 2) + Math.floor((Math.random() * 10000000))  
    }  
    this.options.push(tag)  
    this.value.push(tag)  
  },  
  
  test: function()  
  {  
    let a = this.value  
    let b=[];
```

```
a.forEach(element => {  
  console.log(element.name)  
  b.push(element.id)  
  
});  
  
axios.post('/api/send_categories', {  
  categories: b,  
})  
  
},
```
