

Komponent

```
<input type="text" v-model="keyword">
```

```
data(){
  return{
    keyword: null,
    users:[],
  }
},

mounted() {
  this.loadUsers1();
},

watch: {
  keyword(after, before) {
    this.loadUsers2();
  }
},

methods:{

  loadUsers1: function()
  {
    axios.get('/api/users').then(res=>{
      if(res.status===200)
      {
        this.users = res.data;
      }
    });
  },

  loadUsers2: function()
  {
    axios.get('/api/users', { params: { keyword: this.keyword } }).then(res=>{
      if(res.status===200)
      {
        this.users = res.data;
      }
    });
  }
}
```

Kontroler

```
public function users(Request $request)
{

    $search=$request->keyword;

    $users = User::where('name', 'LIKE','%'.$search.'%')->get();
    return response()->json($users);

}
```
